Summary

Fresh Computer Science graduate with hands-on experience building full-stack web applications, primarily on the MERN stack (MongoDB, Express.js, React, Node.js), along with Next.js and TypeScript. Built several personal and academic projects covering authentication, REST APIs, database design, and responsive UI, with a working understanding of agile workflows and technical documentation (ERDs, DFDs, UML diagrams). Eager to apply and grow these skills in a professional, real-world environment.

Education

Bachelor of Science in Computer Science

BRAC University

2022 – 2026

Dhaka, Bangladesh

Core Skills

Languages: Python, JavaScript, TypeScript, C, PHP

Frameworks & Libraries: Next.js, Express.js, React, SvelteKit, Node.js, WordPress, Tailwind CSS, shadcn/ui

Databases: MySQL, MongoDB, PostgreSQL (Supabase)

Tools: Git, JIRA, ClickUp, Postman, Chrome DevTools, LaTeX

Methodologies: SDLC, Agile (Scrum/Kanban), REST API Design, Sprint Reviews

Design & Docs: UML Diagrams, ERD Design, Data Flow Diagrams, Technical Documentation

Key Projects

FitTrack | *AI-Powered Fitness App* | fit-track-iota-seven.vercel.app | github.com/utshobbose/FitTrack **2025**
• Developed a comprehensive fitness management web app with calorie tracking, meal planning, workout routines, and visual progress dashboards, integrating AI-powered yoga workout plan generation and personalized video recommendations tailored to individual fitness goals.

Smart Resume Analyzer | *AI Job Recommendation Platform* | github.com/utshobbose/SmartAnalyzer **2025**
• Built a React + TypeScript + Vite + TailwindCSS + shadcn/ui + ExpressJs web app using NLP (spaCy NER, HuggingFace embeddings) for intelligent resume parsing, skill extraction, and semantic similarity-based job recommendations, with MongoDB and JWT authentication.

HollowInk | *Horror Blog Platform* | hollow-link.vercel.app | github.com/utshobbose/HollowInk **2026**
• Atmospheric horror blog platform built with React, React Router, and Tailwind CSS, showcasing original Bengali folklore-inspired stories with category filtering, immersive dark thematic UI/UX, and a content architecture designed to scale.

Throttler | *Bike Shop & On-Demand Mechanic Platform* | github.com/utshobbose/Throttler **2025**
• Full-stack PHP + MySQL platform combining a bike e-commerce storefront with an on-demand mechanic booking system, user authentication, and service scheduling, streamlining the entire two-wheeler ownership experience.

Car Workshop | *Appointment Booking System* | car-workshop-eight.vercel.app **2025**
• Next.js + Express.js full-stack application for managing car service appointments with slot-based booking, service type selection, a REST API backend, and a clean admin dashboard, enabling customers to self-schedule visits.

Certifications & Achievements

- **Finalist — Blockchain Olympiad Bangladesh:** Selected as a national finalist in Bangladesh's premier blockchain innovation competition, recognizing applied blockchain research and solution development.
Certificate: drive.google.com/file/d/1bJJnFsr9mtwjK7ILiQZAZFvq2jlj8LwK/view
- **Ostad Platform Certificate:** Completed structured professional development coursework in software development on the Ostad learning platform.
Certificate: ostad.app/share/certificate/c23079-utshob-bose
- **TechHub CodeSprint Challenge — Certificate of Participation** in a competitive programming and software development challenge.
Certificate: drive.google.com/file/d/1ls-2PPcS19DkgbKpSWWhSdwcZjwVFYKdG/view
